## RME Fireface 802

60-Channel High-end 192 kHz USB/FireWire Audio Interface

### The Fireface 802 continues RME's legendary Fireface 800 success.

60 channels of audio, high-end microphone preamps, reference class converters, a complete effects section and up to 192 kHz operation, is the basis for many additional features.

It combines 60 channels of super low latency conversion and operation with RME's legendary driver stability via USB or FireWire. It includes active jitter suppression, professional reference level support, and stand-alone functionality with all core features.

With the latest TotalMix FX the Fireface 802 not only enters the full mixing, monitoring and effects processing world of RME's UCX and UFX, but also adds Class Compliant mode, allowing the Fireface 802 to be fully controlled from an iPad with RME's app TotalMix FX for iPad.
